		Pearson	Chung	Danis	Eng	Grant	Goodman	Puklin	Scheuner	Schroeder	Shatin	Bergthold	Perfetto	Gutman	Holtzman	Voting Member Average	Overall Average
4	For each type of outcome below, how confident are you that methodologically rigorous evidence on the outcome is sufficient to infer whether or not diafnostic genetic testing improves patient centered health outcomes? 1 Not Confident -2- 3 Moderately Confident -4- 5 Highly Confident															menge	
	a. Changes in physician-directed patient management	3	5	2	2	1	1	1	1	1	4	1	1	1	1	2.10	1.79
	b. Indirect or intermediate healthcare outcomes e.g., changes in laboratory test results such as hemoglobin or time to achieve a target value	4	5	3	4	1	3	1	4	4	4	2	3	3	1	3.30	3.00
	c. Direct patient-centered healthcare outcome e.g., mortality, functional status, adverse events	5	5	5	4	5	4	5	5	5	5	4	5	5	1	4.80	4.50
