### 1. Overview of the Plan Attributes PUF

The Centers for Medicare & Medicaid Services (CMS) Center for Consumer Information and Insurance Oversight (CCIIO) is releasing the State-Based Exchange (SBE) PUF in order to improve the transparency and increase access to the SBE data. The SBE PUF includes data on Qualified Health Plans (QHPs) and Stand-alone Dental Plans (SADPs) offered in states which operate their own Marketplaces that do not rely on the federal information technology platform for QHP eligibility and enrollment functionality. This includes states which operate their own Small Business Health Options Programs (SHOP).

The Plan Attributes PUF (Plan-PUF) is one of the six files that make up the SBE PUF. The Plan-PUF contains plan level data on maximum out of pocket payments, deductibles, cost sharing, health savings account (HSA) eligibility, formulary ID, and other plan attributes. These data originate from the Plans & Benefits template (i.e., template field), an Excel-based form used by issuers to describe their plans in the QHP/SADP application process, and were provided by the National Association of Insurance Commissioners (NAIC) by extracting the information from their System for Electronic Rate and Form Filing (SERFF). The issuer can also import data created in other templates (e.g., Network IDs from the Network ID template, Service Area IDs from the Service Area Template, and Formulary IDs from the Prescription Drug template) to use as allowable values for the applicable fields in the Plan & Benefits template, or enter these values manually.

This data dictionary describes the variables contained in the Plan-PUF file for each SBE. Each record relates to one issuer's insurance plan. The Plan-PUF is available for SBEs for plan year 2019.
