\* Years in which the outlier payment was made per claim rather than per separately paid service.

\*\* Payment made per claim until April 1, 2002, at which point outlier payments were made on a service basis.

\*\*\* CMS determines CMHC eligibility for outlier payments using only a multiple threshold. CMS used the hospital multiple threshold for CMHCs until 2004, when a specific CMHC multiple threshold was established. Beginning in CY 2010, CMS determined CMHC eligibility for outlier payments for either level of Partial Hospitalization using the payment rate for the higher level APC applicable to CMHCs. We note that in the CY 2020 OPPTS, CMHCs are paid through a single APC, APC 5853

(Partial Hospitalization (3 or more services) for CMHCs) and that OPPS outliers for each CMHC are capped at 8% of each CMHC's aggregate payments.
