

MEDICARE-MEDICAID COORDINATION OFFICE

DATE: February 28, 2025

TO: Medicare-Medicaid Plan in Rhode Island

FROM: Lauren Gavin
Acting Director, Models, Demonstrations and Analysis Group

SUBJECT: Revised Rhode Island-Specific Reporting Requirements and Value Sets Workbook

The purpose of this memorandum is to announce the release of the revised Medicare-Medicaid Capitated Financial Alignment Model Reporting Requirements: Rhode Island-Specific Reporting Requirements and corresponding Rhode Island-Specific Value Sets Workbook. These documents provide updated technical specifications and applicable codes for the state-specific measures that the Rhode Island Medicare-Medicaid Plan (MMP) is required to collect and report under the demonstration. As with prior annual update cycles, revisions were made in an effort to streamline and clarify reporting expectations for the Rhode Island MMP.

Please see below for a summary of the substantive changes to the Rhode Island-Specific Reporting Requirements as compared to the prior version. Note that the Rhode Island-Specific Value Sets Workbook also includes changes; the Rhode Island MMP should carefully review and incorporate the updated value sets, particularly for measure RI1.4. The Rhode Island MMP must use these updated specifications and value sets for measures due on or after June 2, 2025.

This release also includes an updated version of the Rhode Island-Specific Reporting Requirements that was previously issued February 29, 2024. The updated 2024 version incorporates the changes noted below and should be used for measures due before June 2, 2025.

Should you have any questions, please contact the Medicare-Medicaid Coordination Office at mmcocapsreporting@cms.hhs.gov.

SUMMARY OF CHANGES

Measure RI4.2

- Retired measure RI4.2 due to changes to the Minimum Data Set (MDS) assessment tool that would substantially impact reporting.

Measure RI4.5

- In the Notes section, revised the criteria for identifying data element A, data element A exclusions, and data element B to align with updated specifications from the measure steward (CMS/MDS).
