

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER / SUPPLIER / CLIA IDENTIFICATION NUMBER <b>315290</b>	(X2) MULTIPLE CONSTRUCTION A. BUILDING _____ B. WING _____	(X3) DATE SURVEY COMPLETED <b>07/10/2020</b>
NAME OF PROVIDER OF SUPPLIER <b>BUCKINGHAM AT NORWOOD, THE</b>		STREET ADDRESS, CITY, STATE, ZIP <b>100 MCCLELLAN STREET NORWOOD, NJ 07648</b>	
For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.			
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)		
F 0880  <b>Level of harm</b> - Minimal harm or potential for actual harm  <b>Residents Affected</b> - Few	<p><b>Provide and implement an infection prevention and control program.</b></p> <p>Based on observation, interview, and review of pertinent facility documentation, it was identified that the facility failed to ensure that a staff member donned the appropriate Personal Protective Equipment while caring for COVID-19 positive residents. This deficient practice was identified on the COVID-19 cohort unit in the facility and was identified by the following: On 07/10/2020 from 10:23 AM to 11:15 AM, the surveyor conducted the entrance conference in the presence of the Administrator and Director of Nursing (DON) prior to conducting a tour of the facility. The surveyor asked if specific staff were designated to the COVID-19 positive unit. The DON stated that the facility designated specific staff members to care for the COVID-19 positive residents. The surveyor asked the Administrator and DON what PPE the staff were required to wear when providing care to the COVID-19 positive residents. The DON stated that the staff were required to wear full PPE, which consisted of a N95 mask with a surgical mask over it, gowns, gloves, and goggles or face shield. On 07/10/2020 at 12:25 PM, the surveyor conducted a tour on the Maple Unit in the facility that was identified as the COVID-19 positive unit. Prior to entering the unit, the surveyor observed that there was a plastic tarp which sectioned off the unit from the other hallways in the facility. The surveyor observed a large plastic bin outside of the plastic tarp area which contained Personal Protective Equipment (PPE). The top drawer of the plastic bin contained eight disposable blue gowns and multiple KN95 masks. The second drawer of the plastic PPE bin contained three boxes of surgical masks. The bottom drawer of the plastic PPE bin contained various sizes of gloves. At 12:29 AM, the surveyor entered the COVID-19 unit and observed a Certified Nursing Aide (CNA) standing next to a resident in the COVID-19 hallway. The CNA was observed only wearing a KN95 mask. The surveyor did not observe the CNA wearing a surgical mask over her KN95 mask, a face shield or goggles, a gown, or a pair of gloves. The surveyor conducted an interview with the CNA who stated that she should have been wearing a gown when caring for residents on the COVID-19 positive unit. The surveyor asked the CNA if she was designated to care for other residents in the facility. The CNA stated that she did not work on another unit in the facility and was designated to caring for the COVID-19 positive residents. The CNA further stated that when she entered the COVID-19 unit she was supposed to put on a gown, gloves, and mask. The CNA did not mention wearing goggles or a face shield as an additional form of PPE. At 12:47 PM, the surveyor conducted an interview with the RN who was responsible for the care of the residents who resided on the COVID-19 positive unit. The RN confirmed that the CNA was designated to only caring for the residents on the COVID-19 unit. The RN further stated that the CNA was not wearing the appropriate PPE while on the unit and should have donned a gown, gloves, N95 mask or KN95 mask, and either goggles or a face shield prior to entering the unit. The RN further stated that gloves would be required to be worn while providing direct care for the residents in their rooms. A review of the facility's Transmission-Based Precautions Policy and Procedure, revised 2019, indicated that when healthcare personnel cared for a resident on contact precautions, they would be required to wear a gown and gloves while interacting with the resident and the resident's environment. In addition, the policy indicated that when a resident was on droplet precautions Healthcare personnel wear a mask and eye/face shield for close contact with the infectious resident. A review of the Outbreak Management Checklist for COVID-19 in Nursing Homes and other Post-Acute Care Settings issued by the New Jersey Department of Health and New Jersey Communicable Disease Services, dated 5/11/2020, indicated Implement Standard and Transmission-Based Precautions including use of N95 respirator or higher (or facemask if unavailable), gown, gloves, and eye protection for new and re-admissions, confirmed and suspected COVID-19 case(s), and any patient/resident cared for by a confirmed or suspected COVID-19 positive HCP (Health Care Provider). Note HCP (Health Care Provider) should use all recommended COVID-19 PPE for the care of all patients/residents on affected units (or facility-wide if cases are widespread); this includes both symptomatic and asymptomatic patients/residents. NJAC 8:39-27.1(a)</p>		
LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE	TITLE		(X6) DATE

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
