DATE: December 18, 2023

TO: All Prescription Drug Plans, Medicare Advantage-Prescription Drug Plans, Section 1876 Cost Plans, and Medicare-Medicaid Plans

SUBJECT: Submission of 2023 Beneficiary-Level Medication Therapy Management (MTM) Program Data

The Centers for Medicare & Medicaid Services (CMS) requires that Part D sponsors with an approved Medication Therapy Management (MTM) program submit beneficiary-level MTM program data for Contract Year (CY) 2023 per the Part D Reporting Requirements. Submission of CY 2023 beneficiary-level MTM data will be submitted through the Health Plan Management System (HPMS).

The reporting deadline for these data is **2/26/2024 11:59 p.m., PT**. This memo provides information regarding the submission process.

Submission

For CY 2023, Part D sponsors should submit the beneficiary-level MTM data file in the HPMS Plan Reporting Module via upload.

Naming Conventions

You must use the following file naming conventions to submit your data: H1234.CY2023.MTMP

Important Reminders:

- You must submit a separate file for each contract number. All files must include an end-of-file marker (i.e., mark the file with an enter or a new line after the last record is written).
- Do not submit data using double-byte character sets (i.e., Unicode). All submissions should use a single-byte character set (i.e., ASCII).

- Only the most current Medicare Beneficiary Identifier (MBI) number should be used.¹ In the rare situation where a beneficiary's MBI changes in the middle of a reporting period, a sponsor may collapse the beneficiary's reporting data into one line item using the most current MBI during the reporting period. There should not be more than one record reported for a single beneficiary (regardless of whether the records are exact duplicates).

Timely Submission and Resubmissions

Your beneficiary-level MTM data file must be submitted by the **reporting deadline of 2/26/2024 11:59 p.m., PT** and must successfully pass validation by the deadline to be considered timely.

Please Note: You may submit your file more than once before the deadline; however, only the latest submission will be considered for CMS review. It may take up to 36 hours for the validation process to complete, so please allow adequate time should you need to make corrections and resubmit your file by the reporting deadline.

If you need to correct errors in your initial submitted and validated file, you may do so by resubmitting a corrected file from 3/01/2024 through 3/31/2024 11:59 p.m., PT. A file that is resubmitted during this window must be received and successfully pass validation by 3/31/2024 11:59 p.m., PT to be accepted into the system. The system does not retain records of prior validated submissions or files that failed to pass validation. Any submissions sent after 3/31/2024 11:59 p.m., PT will not be validated or accepted. In addition to compliance actions for not submitting MTM data, contracts will also not have data for Data Validation, or for CMS' use in performance measures such as the MTM Star Rating measure.

Please consider the following sample scenarios regarding submissions:

Timely submissions:

- If you submit your file on or before the reporting deadline, 2/26/2024 11:59 p.m., PT, and your file passes validation by the deadline, this will count as a timely submission and your file will be accepted into the system.

Overdue and Late submissions:

- If you upload your file on or before the reporting deadline of 2/26/2024 11:59 p.m., PT, but your file is processed after the deadline and your file fails validation, your contract will be identified as overdue, and no data file submission will be recognized.
- If you submit multiple files on or before the reporting deadline of 2/26/2024 11:59 p.m., PT, one or more files pass validation, but your last file is processed after the deadline and the file fails validation, your contract will be identified as overdue and no data file submission will be recognized (the system does not retain your earlier submissions, even if they passed validation).

¹ For more information, please see the March 30, 2018 HPMS Memorandum "New Medicare Beneficiary Identifier (MBI) in the Health Plan Management Systems (HPMS)."

- If you submit your file on or before the reporting deadline of 2/26/2024 but your file fails validation, and you resubmit a second file on or before 3/31/2024 11:59 p.m., PT which passes validation, this will count as a late submission, but your file will be accepted into the system.

Please review the section entitled “Validation Process and Response Files” for information on the submission and validation process.

Validation Process and Response Files

CMS, with contractor support from Softrams, will perform validations on your data and provide you with a response file to indicate acceptance of the file or to indicate corrections that are needed.² This process may take up to 36 hours.

A notification email will be sent to inform you when your MTMP file has been processed and the response file is ready for pick up at:

HPMS > Quality and Performance/Plan Reporting > Plan Reporting Start Page > CY 2023 > View Submission >

- If your file passes validation, there is nothing further that needs to be done as your file has been successfully validated.
- If your file fails validation, the response file will identify the errors that need to be addressed for your file to be successfully validated.
- Blue indicates the file passed validation and red indicates the file failed validation. Click the view icon to populate the View Submitted Data screen/View Upload Error screen to download the response file.

Please refer to **Appendices A and B** for sample response files, **Appendix C** for the response file layout, and **Appendix D** for a listing of the reasons for rejection.

If your response file indicates that corrections are needed, resubmit or have your third-party vendor resubmit **a complete replacement file** for your contract number as soon as possible.
