

Centers for Medicare & Medicaid Services CY 2020 Out-of-Pocket Cost Model FAQs

1. **Question:** Does Centers for Medicare & Medicaid Services (CMS) offer any alternative methods for calculating Out-of-Pocket Cost (OOPC) amounts for plan sponsors that do not have access to PC SAS?

Answer: CMS does not offer alternative tools for calculating OOPC values for plans that do not have access to SAS. We recommend that you continue to use the tools/methodology that you employed for calculating OOPC values for contract year (CY) 2019. Medicare Advantage (MA) plans can use these tools in meeting total beneficiary cost (TBC) requirements. As discussed in the CY 2020 Call Letter, plans are expected to submit bids that comply with CMS requirements.

2. **Question:** What are the changes in the CY 2020 model compared with CY 2019?

Answer: The following lists the substantive changes to the model.

The version of the OOPC model described in this document is an update of the CY 2019 model delivered in April 2018. For the 2020 OOPC model, the items listed below summarize the changes that have been made.

- Updated MCBS inflation and drug utilization factors provided by the Office of the Actuary (OACT). These factors inflate the 2013 and 2015 MCBS utilization cost data to CY 2019 levels. The April 2018 model inflated 2012 and 2013 MCBS utilization data to CY 2018 levels.
 - Updated the Medicare Part A and B deductibles, coinsurance, and premiums to 2019 values. OOPC estimates will be affected if plans apply cost sharing to any of these values.
 - Updated the Part D policy parameters (deductible, initial coverage limit, gap coverage percentages, etc.) to 2020 values.
 - Updated Prescription Drug Event (PDE) data for drug price calculation. (The CY 2020 OOPC Plan V1 uses 2018 PDE data; a subsequently released Plan Model V2 includes 2019 prices and RXCUIs for selected recently available drugs.)
 - Updated the Part D input data using March 2019 updates of the FRF, cross-reference, generic substitution, Medispan-FDB, and ADSF (Applicable/Non-Applicable) files.
 - Updated the code to take into account 2020 PBP data structure and variable name changes.
 - Updated the code to take into account new PBP Benefit B-7k Opioid Treatment Services.
3. **Question:** Are Dual Eligible Special Needs Plans (SNPs) excluded from the OOPC Model?

Centers for Medicare & Medicaid Services CY 2020 Out-of-Pocket Cost Model FAQs

Answer: The OOPC tool will calculate the OOPC values for Dual Eligible Special Needs Plans (SNPs). However, beneficiary data for dual eligible beneficiaries were excluded from the MCBS data for the development of the OOPC model as it was deemed unrepresentative of the beneficiaries enrolling in these plans. Therefore, the resulting calculations may not be reliable for Dual Eligible SNPs. The CMS Call Letter provides guidance regarding meaningful difference (Prescription Drug Plan (PDP) organizations) and total beneficiary cost requirements (MA organizations). Also, please refer to the OOPC methodology document posted on the CMS website at: <https://www.cms.gov/Medicare/Prescription-Drug-Coverage/PrescriptionDrugCovGenIn/OOPCResources.html> for further technical details.

4. **Question:** Will the CY 2020 OOPC model work with older versions of SAS or SAS versions other than PC SAS (e.g. SAS running on UNIX or Mainframe)?

Answer: The CY 2020 OOPC model has been tested on PC SAS Version SAS 9.4. (The model also can be run using SAS Enterprise Guide). We expect the tool to run, with minor modifications, on older versions of SAS or SAS running on a different environment. However, CMS cannot guarantee a successful run.

5. **Question:** Will the CY 2020 OOPC model run on a networked version of SAS?

Answer: The model code is platform independent and should be able to be run in a network environment.

6. **Question:** What is the approximate amount of free disk space necessary for the model to run?

Answer: It has been recommended that the model requires at least 3GB of RAM and about 30GB of free disk space. However, the actual disk space requirements are dependent on the number of plans being run at one time and the particular hardware/software configuration of a user. In such cases, additional free disk space may be needed.

7. **Question:** Does the CY 2020 OOPC Model require administrative rights on the computer to run?

Answer: Administrative privileges are not required to run this model on a PC.

8. **Question:** Does the CY 2020 OOPC Model require any SAS add-ins to run? Is base SAS 9.4 sufficient?

Answer: Base SAS 9.4 (or SAS 9.3) with SAS/ACCESS Interface to PC Files installed is needed to run the model.

9. **Question:** How can organizations obtain information about policy related questions regarding requirements for meaningful difference (PDP organizations), total beneficiary cost (MA organizations)?

Centers for Medicare & Medicaid Services CY 2020 Out-of-Pocket Cost Model FAQs

Answer: Organizations are encouraged to review the CY 2020 Call Letter and related HPMS communications.

- For Part C policy related questions about Total Beneficiary Cost (TBC), please contact <https://mabenefitsmailbox.lmi.org/>
- For Part D policy related questions about meaningful difference, please submit an email to partdbenefits@cms.hhs.gov
- For technical questions about the Bid Pricing Tool, please submit an email to actuarial-bids@cms.hhs.gov
- For technical questions about the OOPC model, please submit an email to OOPC@cms.hhs.gov
