

CJR PRO Performance Year 5 Data Submission Overview

For successful submission of CJR Patient-Reported Outcomes (PRO) data in performance year (PY) 5, hospitals must submit post-operative data for patients who received elective primary total hip arthroplasty and/or total knee arthroplasty (THA/TKA) in PY 4 and pre-operative and risk variable data for patients undergoing an elective primary THA/TKA in PY 5.

All pre- and post-operative PRO data submitted in PY 5 should be entered into the **CJR PRO Data Collection Template** and submitted using Managed File Transfer (MFT) between **July 1, 2020 and August 31, 2020**.

POST-OPERATIVE DATA TO SUBMIT IN PY 5

Hospitals should submit post-operative data for procedures performed **during the PY 4 performance window** (July 1, 2018 to June 30, 2019).

- Data should be submitted for **at least 80% or at least 200** of the eligible primary THA/TKA procedures performed during PY 4.

Post-operative data must be submitted on **the same patients** for whom hospitals submitted pre-operative PRO and risk variable data in PY 4 so that:

- Hospitals have submitted **matched pre- and post-operative data** for at least 80% or at least 200 of the eligible primary THA/TKA procedures performed during the PY 4 timeframe, July 1, 2018 to June 30, 2019.

Post-operative data should be **collected 270 to 365 days after the procedure**.

PRE-OPERATIVE DATA TO SUBMIT IN PY 5

Hospitals should submit pre-operative data for procedures performed **during the PY 5 performance window** (July 1, 2019 and June 30, 2020).

- Data should be submitted for **at least 80% or at least 200** of the eligible primary THA/TKA procedures performed during PY 5.

Hospitals are strongly encouraged to collect pre-operative and risk variable data for **more** procedures than the required minimum. Doing so will increase a hospital's chances of success in PY 5 (in case a submitted procedure does not meet eligibility requirements).

Pre-operative data should be **collected 90 to 0 days prior to the procedure**.
