

## Storm Data and Unusual Weather Phenomena - November 2022

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

### OKLAHOMA, Panhandle

(OK-Z001) CIMARRON, (OK-Z002) TEXAS, (OK-Z003) BEAVER

11/01/22 00:00 CST	0	Drought
11/30/22 23:59 CST	0	

Soil moisture remained low to very low through the month of November. The continuation of an extended drought left farmers and ranchers seeking ways to water crops and feed livestock. Drought continued to affect the quality of forage, which forced producers to bale failed crops as well as grasses that are not normally harvested as forage. The worst of the drought in the Great Plains was across the Oklahoma Panhandle and far northern Texas Panhandle into much of southern Kansas and into Oklahoma. A few counties in the Panhandles were free of Severe Drought (D2) for the month of November but were not completely free of drought and were classified in Moderate Drought (D1).

### TEXAS, North Panhandle

(TX-Z001) DALLAM, (TX-Z002) SHERMAN, (TX-Z003) HANSFORD, (TX-Z004) OCHILTREE, (TX-Z005) LIPSCOMB, (TX-Z006) HARTLEY, (TX-Z007) MOORE, (TX-Z008) HUTCHINSON, (TX-Z009) ROBERTS, (TX-Z010) HEMPHILL, (TX-Z011) OLDDHAM, (TX-Z012) POTTER, (TX-Z013) CARSON, (TX-Z014) GRAY, (TX-Z016) DEAF SMITH, (TX-Z017) RANDALL COUNTY, (TX-Z020) COLLINGSWORTH

11/01/22 00:00 CST	0	Drought
11/30/22 23:59 CST	0	

Soil moisture remained short to very short through the month of November. The continuation of extended drought left farmers and ranchers seeking ways to water crops and feed livestock. Drought continued to affect the quality of forage, forcing producers to bale failed crops as well as grasses that are not normally harvested as forage. The worst of the drought in the Great Plains was across the Oklahoma Panhandle and far northern Texas Panhandle into much of southern Kansas and into Oklahoma. A few counties in the Panhandles were free of Severe Drought (D2) for the month of November but were not completely free of drought and were classified in Moderate Drought (D1).

(TX-Z006) HARTLEY, (TX-Z007) MOORE

11/24/22 06:39 CST	0	High Wind (MAX 52 kt)
11/24/22 07:17 CST	0	

During the morning of the 24th, a strong cold front pushed south along the east side of the Rocky Mountains. This cold front brought 30 to 40 mph winds to the western combined Oklahoma and Texas Panhandles. A couple of places in the western Texas Panhandle also gusted above 58 mph early in the morning with the passage of the cold front.
