

UA/...RM YUKON RIV BISHOP ROCK APPARENT ICE JAM

**Ice jam** - an ice run that has stopped moving due to any of a variety of reasons; characterized by a long reach of tightly packed chunk ice

**Location format** - point or segment

### ICE JAM THREAT LOCATIONS

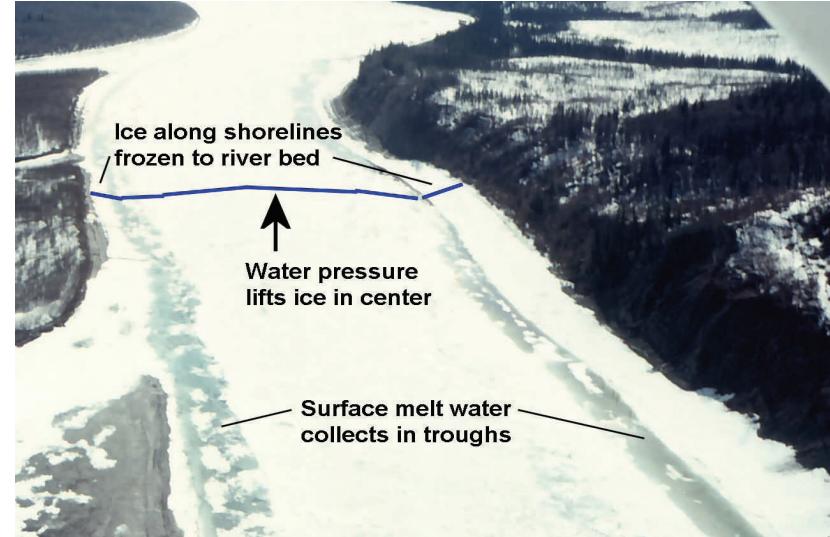

- Ice jams can occur at any location
- Historic ice jam problems at Bishop Rock on the Yukon River and below Aniak on the Kuskokwim River
- Threats also associated with ice conditions at and up to 10 miles down river from...

-Eagle, Circle, Fort Yukon, Galena, Koyukuk, Nulato, Russian Mission, Pilot Station, and delta villages on the Yukon

-McGrath, Sleetmute, Red Devil, Crooked Creek, Akiak, Kwethluk, and Bethel on the Kuskokwim

-Kobuk on the Kobuk and Buckland on the Buckland

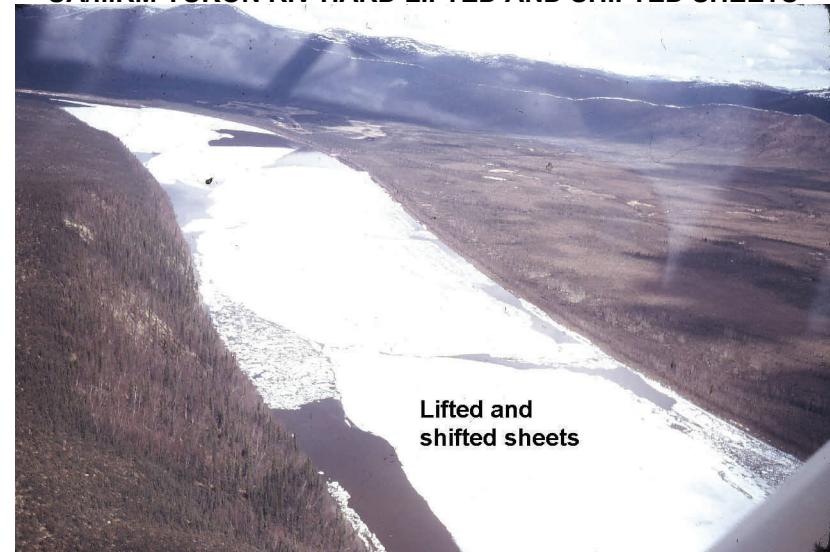

UA/...RM YUKON RIV ARCHED ICE

**Arched ice** - ice that is attached to the banks, which rises in the center of the channel due to increased flow beneath the ice causing melt water to collect in channels along banks

**Location format** - point or segment

UA/...RM YUKON RIV HARD LIFTED AND SHIFTED SHEETS

**Shifted ice** - large ice sheets that have moved short distances from their original locations as rising water levels create wider areas of open water into which the ice can move

**Location format** - point or segment

## UA/...RM YUKON RIV HVY MXD RUN

**Ice run** - a continuous length of moving ice

**Location format** - point or segment

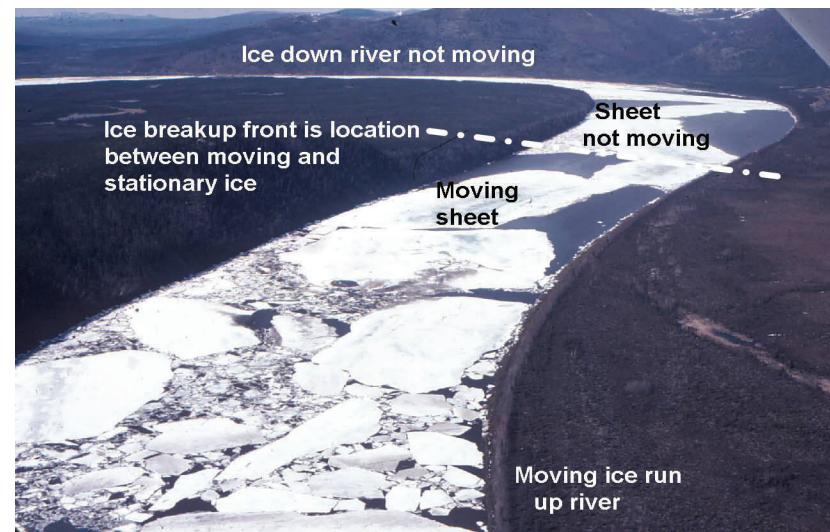

## UA/...RM YUKON RIV HVY RUN MOSTLY CHUNKS

**Ice run** - a continuous length of moving ice

**Location format** - point or segment

## UA/...RM YUKON RIV BREAKUP FRONT

**Breakup front** - location along river where ice is moving upstream and not moving downstream

**Location format** - point only

- Breakup date and time is when breakup front passes a location
- Flood threat due to an ice jam is greatest just after breakup front passes village
- Can be difficult to differentiate between breakup front and an ice jam

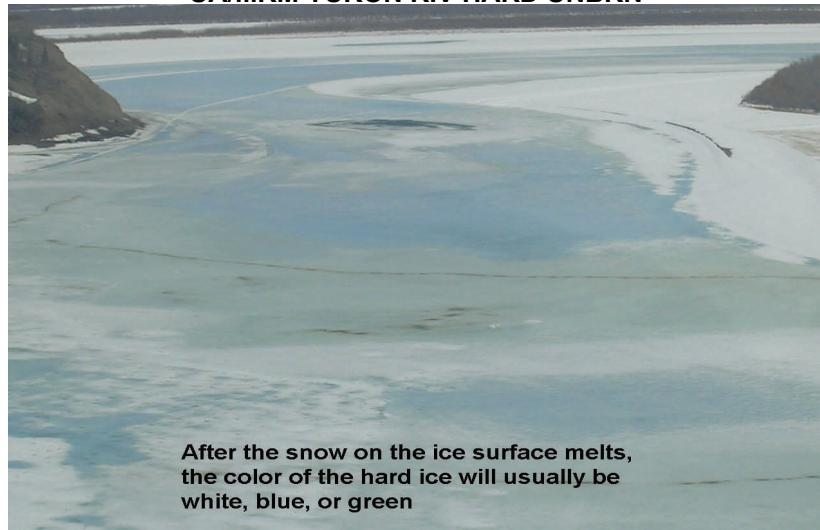

The ice breakup front can move down river like an inch-worm...the front may stall out temporarily to wait for the back end to catch up...this would not be called an ice jam

Look for a significant amount of the ice run packing in up river from the location where the breakup front stopped...this would be an indication of an ice jam

## Pre-Breakup

## Flooding

### UA/...RM YUKON RIV HARD UNBKN

After the snow on the ice surface melts, the color of the hard ice will usually be white, blue, or green

**Unbroken ice** - continuous ice surface that has few if any cracks

**Location format** - point or segment

### UA/...RM KUSKO RIV ANI VILLAGE AND RWY (10% USABLE) FLOODING

An ice jam on the Kuskokwim River causes village and runway flooding at Aniak

**Village flood** - water spreading into a village that covers roads or threatens buildings

**Location format** - point or segment

### UA/...RM YUKON RIV UNBKN MOSTLY ROTTEN ICE

**Rotten ice** - weak ice that appears black or brown

**Location format** - point or segment

### UA/...RM YUKON RIV WIDESPREAD FLOODING

**Widespread flooding** - water that has gone over the banks and covered vast areas of land that are normally dry

**Location format** - point or segment

## Post-Breakup

### UA/...RM YUKON RIV MOD ICE RUN

**Ice or debris run** - a length of river channel containing moving ice or debris (trees, brush, etc.)

**Location format** - point or segment

### UA/...RM KOYUKUK RIV OPEN HVY STRANDED ICE ON SHORE

**Stranded ice** - ice pushed onto the banks or into side channels that is left behind after the ice has cleared out of the main channel

**Location format** - point or segment

## RIVER ICE PILOT REPORT REMARKS

River Watch is a voluntary program asking pilots to report observed river conditions.

- Requesting observations that can be obtained without deviation from the normal route or flight level.
- Purpose of program is to assist the NWS in providing accurate forecasts, warnings, and navigation information.
- Standard method of reporting is to submit pilot report to FAA's Flight Service Stations by radio. In addition to reporting location and other standard pilot report elements, provide the river name and ice condition using standard remarks below. For example...

**FAI UA/OV GAL270013/TM 2355/FL060/TP C207/RM YUKON RIV**  
**BISHOP ROCK APPARENT ICE JAM**

### **STANDARD REMARKS**

<b><u>PRE-BREAKUP</u></b>
UNBKN ICE
ARCHED ICE
