05/09/08 04:21 EST 0 Marine Thunderstorm Wind (MG 48 kt)

05/09/08 04:21 EST 0 Source: ASOS

The automated observation at Patuxent River Naval Air Station measured a wind gust of 48 knots.

A strong low pressure system crossed the Mid Atlantic during the afternoon and evening hours of May 8th and into the early morning hours of May 9th. This system along with warm temperatures and high dew points triggered numerous strong to severe showers and thunderstorms across the region. Thunderstorms that moved over the Tidal Potomac River and Maryland Chesapeake Bay produced wind gusts to nearly 50 knots.

The Coast Guard rescued a crew of 14 midshipmen and their coaches when a gust of wind broke the mast of their 49 ft ship. No injuries were reported.

A potent storm system crossed the region May 12th. Warm and moist air filtered in ahead of the system, bringing widespread showers and thunderstorms with heavy rain. The pressure gradient with the low pressure system produced strong gusty winds across the Tidal Potomac River and Maryland Chesapeake Bay late on the 11th and into the early morning hours of the 12th. The Coast Guard received a call of a 49-ft ship with a broken mast suffered during one storm in the West River portion of the Chesapeake Bay. They rescued 14 midshipmen and coaches, but none were injured.

05/09/08 01:00 EST 0 Flash Flood (due to Heavy Rain)

05/09/08 03:00 EST 0 Source: Newspaper

There were numerous reports of roads closed in Prince Georges County due to flash flooding and high water. Roads closed in Hyattsville caused significant travel problems. Flash flooding on US Route 50 at Columbia Park Road just east of Route 21 in Cheverly caused several vehicles to stall. Nine water rescues were reported in Cheverly. More roads were closed in Landover and Accokeek.

Deaths & Location Date/Time Property & **Event Type and Details** Iniuries Crop Dma Spotsylvania County Emergency Management reported that West Catharpin Road in Logan was closed due to high water. A strong low pressure system crossed the Mid Atlantic during the afternoon and evening hours of May 8th. This system along with warm temperatures and high dew points triggered numerous strong to severe showers and thunderstorms across the region. Two tornadoes occurred in central Virginia. Several storms produced damaging winds that downed trees and power lines in portions of northern and central Virginia. A few locations reported flooding as storms trained over the same area through the afternoon and STAFFORD COUNTY --- LEELAND [38.35, -77.43], HOLLY CORNER [38.37, -77.57], RUBY [38.50, -77.52], GARRISONVILLE [38.47, -77.42] 05/11/08 18:00 EST Flood (due to Heavy Rain) 0 05/12/08 14:00 EST Source: Emergency Manager 0 Stafford County Emergency Management reported numerous roads flooded in the county. Newspapers reported that Johnson's Mill Road, Rockford Road and Doe Gully Road were closed due to high water.

A potent storm system crossed the region May 12th. Warm and moist air filtered in ahead of the system, bringing widespread showers and thunderstorms with heavy rain. Heavy rain began to overspread the region during the evening of the 11th and continued through the morning of the 12th. Several streets were flooded and closed during through the following morning in the Martinsburg area.
