A wind gust in excess of 30 knots was report	ted at Lower Hooper Island.			
A pressure trough combined with warm an	nd humid conditions to trigger sh	nowers and thunde	erstorms during th	e afternoon and evening
hours of June 2nd. The warm and humid c	onditions caused plenty of instal	bility and this lead	to some of the th	understorms causing
gusty winds and large hail.

The road was blocked by debris fro	om flach flooding			·
THE TOAU WAS DIOCKED BY DEDIIS ITO	on nasn nooding.			

A stalled boundary remained over West Virginia during the evening and overnight hours of the 17th into the early morning hours of the 18th. Showers and thunderstorms developed in the vicinity of this boundary. With plenty of moisture throughout the atmosphere, thunderstorms produced locally heavy rain which lead to areas of flash flooding.
