				, , ,

Short Road near the Berkeley-Jefferson Counties line had flash flooding. A nearby spotter recorded 2.72 inches of rainfall.

Showers and thunderstorms developed in the lee of the Appalachians during in afternoon, in advance of a slow moving cold front. Moisture in association with the remnants of Tropical Storm Beryl boosted rainfall rates and some of the showers and thunderstorms trained repeatedly over the same locations. An isolated flash flood occurred in Jefferson County, with up to 2.72 inches rainfall reported.
