Storm Data and Unusual Weather Phenomena - November 2015

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
(VA-Z036) NELSON				
	11/30/15 06:00 EST		0	Winter Weather
	11/30/15 11:00 EST		0	

Retreating high pressure to the north ahead of an approaching warm front let to a CAD situation, with temperatures hovering right around freezing for a good portion of the day for very isolated spots at the highest elevations of the Blue Ridge. The combo of the light rain overrunning the warm front and the freezing temps led to trace ice amounts.

(WV-Z052) BERKELEY			
	11/03/15 03:57 EST	0	Dense Fog
	11/03/15 08:00 EST	0	
•	e passing to the south combining with light w	inds under high pressu	re and mostly clear skies led
to patchy dense fog.	e passing to the south combining with light w	rinds under high pressu	re and mostly clear skies led
Increased moisture from low pressur to patchy dense fog. (WV-Z502) EASTERN GRANT	e passing to the south combining with light w	vinds under high pressu	re and mostly clear skies led High Wind (MAX 52 kt)

A cold front moved through the region during the overnight hours. A pressure surge in the wake of the front produced gusty winds at elevations higher than 2000 ft.
