Rushing water entered the Cleveland Park Metro Station from Connecticut Avenue. Flooding was observed inside the metro station.

A cold front moved into the Mid-Atlantic region and showers and thunderstorms formed on the warm, unstable side of the boundary. Some thunderstorms produced heavy rainfall that led to flooding.

MARYLAND, Central

06/02/16 18:00 EST 0 Thunderstorm Wind (EG 50 kt) 06/02/16 18:00 EST 0 Source: 911 Call Center

A tree was reported down on Blackberry Dr.

ALLEGANY COUNTY --- 0.7 SE OLDTOWN [39.54, -78.61]

06/02/16 19:00 EST 0 Thunderstorm Wind (EG 50 kt) 06/02/16 19:00 EST 0 Source: 911 Call Center

A tree was reported down across Route 51.

A weak boundary lingered over the region with a cold front approaching the region. Full sunshine across the area led to increased instability, producing scattered showers and thunderstorms.

ALLEGANY COUNTY --- 0.7 NNE LUKE [39.49, -79.04], 0.3 NNE LUKE [39.48, -79.05], 0.3 NW LUKE [39.48, -79.05], 0.6 WNW LUKE [39.48, -79.06], 0.6

Location Date/Time Deaths & Property & **Event Type and Details** Injuries Crop Dmg The National Weather Service, Baltimore-Washington DC Weather Forecast Office, conducted a survey of storm damage that occurred in western Howard County Maryland from severe storms that struck that county shortly after 1 pm EDT on Tuesday, June 21, 2016. Estimated maximum wind speed was 80 mph, making the tornado an EF-0. Initial tornado touchdown was established near the intersection of Old Annapolis Road and St. Michaels Road just southwest of Lisbon at 129 PM EDT. Properties there sustained tree damage with multiple trees snapped, uprooted, and topped in multiple directions. A large garage had its doors bowed by the wind. Small objects were lofted. The tornado continued towards the southeast, passing through the areas of Glenwood and Glenelg, before lifting just before Ellicott City in the vicinity of Manor Lane and Carroll Mill Road. Along its path, the tornado caused nearly continuous tree damage, with large trees and tree branches snapped, uprooted, and topped in multiple directions. The trees downed many power lines and blocked multiple roads. Some trees and large branches fell on homes and garages. There were a few instances of minor roofing damage from the wind, but largely home damage was limited to tree falls. Several small outbuildings were either damaged or destroyed. Minor wind damage from strong thunderstorm winds continued southeast into Ellicott City, but no tornado damage was found. Tree damage from thunderstorm downburst (straight-line) winds was noted as far west as Schafferville Rd, between Long Corner Rd and Florence Road. A stationary front remained draped across the region, placing most of the area in a moist and unstable air mass. A shortwave moving

through combined with this air mass to trigger showers and thunderstorms.

PENDLETON COUNTY --- 0.7 S SUGAR GROVE [38.51, -79.32]

Location

Injuries **Crop Dmg** Patterson Creek exceeded its flood stage between 6/2 2321 EST and 6/3 0030 EST. The gauge peaked at 9.05 feet at 6/3 00:00 EST. Agricultural and minor street flooding occur in the area when flood stage is exceeded. A cold front approached the region while Tropical Storm Bonnie was off the Outer Banks of North Carolina. Full sunshine and easterly flow across the area led to instability and showers and thunderstorms produced heavy rainfall that led to flooding across Central Virginia and the Potomac Highlands. (WV-Z502) EASTERN GRANT, (WV-Z504) EASTERN MINERAL 0 06/04/16 03:16 EST Dense Fog 0 06/04/16 06:55 EST Recent rainfall left the lower levels nearly saturated in the valleys with little movement in the synoptic features to aid in mixing the moisture out. BERKELEY COUNTY --- 1.9 E DARKESVILLE [39.37, -77.99] 06/05/16 13:46 EST 0 Thunderstorm Wind (EG 50 kt) 06/05/16 13:46 EST n Source: Trained Spotter Several two foot diameter trees were reported down on Naden Bousch Lane just east of Route 11. Reported by BK046. A cold front swung through the region, with scattered thunderstorms forming along the boundary.
