Low pressure developed offshore before moving out to sea. Colder air worked its way in from the north causing rain to end as a period of snow. Accumulating snow took place along the Mason-Dixon line where colder air worked its way in first before most of the moisture was gone.

(MD-Z003) WASHINGTON, (MD-Z501) EXTREME WESTERN ALLEGANY, (MD-Z502) CENTRAL AND EASTERN ALLEGANY

03/24/17 05:00 EST 0 Winter Weather

03/24/17 09:00 EST 0

High pressure moved off the coast and a southerly flow developed. The southerly flow ushered in more moisture at the same time and upper-level disturbance was passing through. The upper-level disturbance caused a period of rain, but there was enough cold air in place for rain to freeze on some surfaces during the early morning hours.

DY, (WV-Z501) WESTERN GRANT, ITERN PENDLETON, (WV-Z506)  Winter Storm  13th. The coastal low by. High pressure over commulations were  ASTERN PENDLETON Cold/Wind Chill  Durs of the 15th. The  Winter Weather  en about two and four

High pressure moved off the coast and a southerly flow developed. The southerly flow ushered in more moisture at the same time and upper-level disturbance was passing through. The upper-level disturbance caused a period of rain, but there was enough cold air in

place for rain to freeze on some surfaces during the early morning hours.
