There were three distinct peaks during the long period above flood stage, the highest of which was 14.41 feet, which occurred at 7:30am EST on July 25th. Throughout the flood, portions of Upper Glencoe Road and Lower Glencoe Road were flooded. For most of the time, Sparks Road was also flooded. Water was in buildings off of Sparks Road for over 24 hours from the morning of the 24th until the afternoon of the 25th, ultimately reaching several feet inside those structures. The water receded during the evening of the 25th but rose again overnight, affecting those buildings a second time.
