A squall produced an estimated wind gust to 34 knots (39 MPH) near the ASOS at Saint Inigoes (KNUI) adjacent to the tidal Potomac River.

TANGIER SOUND AND THE INLAND WATERS SURROUNDING BLOODSWORTH ISLAND COUNTY --- CRISFIELD CG (CRS) [37.97, -75.88]

06/17/22 18:16 EST 0 Marine Thunderstorm Wind (MG 36 kt)

06/17/22 18:23 EST 0 Source: Buoy

Wind gusts of up to 36 knots (41 MPH) were measured by the Crisfield WeatherFlow sensor (XCRS).

Thunderstorms produced a few gale to storm force wind gusts over the middle Chesapeake Bay and tidal Potomac River.

DISTRICT OF COLUMBIA

DISTRICT OF COLUMBIA COUNTY --- 1.9 SSE DALECARLIA RESERVOIR [38.92, -77.11]

06/02/22 15:40 EST 10K Thunderstorm Wind (EG 50 kt) 06/02/22 15:40 EST 0 Source: 911 Call Center

There were over half a dozen reports of trees, tree limbs, and wires down in Washington. Wires blew down on Canal Road Northwest inbound at Arizona Avenue Northwest blocking the right side of the roadway.

Scattered to numerous showers and thunderstorms produced isolated instances of large hail and wind damage.

DISTRICT OF COLUMBIA COUNTY --- 0.8 NE TENLEYTOWN [38.96, -77.06], 0.7 ENE TENLEYTOWN [38.95, -77.06], 1.0 N MOUNT PLEASANT [38.94,

-77.05], 1.1 N MOUNT PLEASANT [38.95, -77.05], 1.1 E TENLEYTOWN [38.95, -77.05], 0.9 ENE TENLEYTOWN [38.96, -77.06]

06/02/22 17:00 EST 0 Flash Flood (due to Heavy Rain)

06/02/22 17:25 EST 0 Source: 911 Call Center

Broad Branch Road was closed due to flooding between Beach Drive and 27th Street Northwest.

Page 6 of 32 Printed on: 10/06/2022

Location Date/Time Deaths & Property & Event Type and Details Injuries Crop Dmg

A cold front slowly approached during the afternoon of the 2nd before passing through that night. Showers and thunderstorms developed ahead of the front. There were multiple rounds of thunderstorms, so despite faster storm motion there were a few instances of flooding and flash flooding.

DISTRICT OF COLUMBIA COUNTY --- 0.2 N TENLEYTOWN [38.95, -77.07]

A tree branch was reported down in the 4900 block of 36th Street Northwest.

A strongly unstable airmass in a moderately sheared environment squeezed between two fronts resulted in several clusters of destructive thunderstorms. The most intense thunderstorms propagated north to south along a stalled front dividing very unstable air near and west of Interstate 95, from notably more stable air closer to the Chesapeake Bay.

The event was unusual not only because of the intensity of the thunderstorms, but because they moved in a north to south direction, even propagating south-southwestward at times.

The worst of these storms avoided the District of Columbia, though some minor wind damage was reported in Northwest.

DISTRICT OF COLUMBIA COUNTY --- 0.8 WNW WALTER REED [38.98, -77.04], 0.9 W WALTER REED [38.98, -77.05], 0.8 WSW WALTER REED [38.98, -77.05], 0.7 WSW WALTER REED [38.98, -77.04], 0.5 W WALTER REED [38.98, -77.04], 0.5 W WALTER REED [38.98, -77.04], 0.7 WNW WALTER REED [38.98, -77.04]

 0
 Source: River/Stream Gage

The water level along Rock Creek at Sherrill Drive rose above flood stage, cresting at 7.16 feet at 1:45 AM EST. Water reached several portions of the Valley Trail between picnic areas 7 and 10.

A nearly stationary boundary oriented from north to south set up over the area. Showers and thunderstorms developed along the boundary. Storm motion was also north to south, which allowed for storms to train over the same locations, resulting in isolated instances of flooding.

Beach Drive was closed between Connecticut Avenue and Kensington Parkway.

A nearly stationary boundary oriented from north to south set up over the area. Showers and thunderstorms developed along the boundary. Storm motion was also north to south, which allowed for storms to train over the same locations, resulting in isolated instances of flooding.

Tree damage was reported near Romney, including along WV-28 Cumberland Road near Potomac Avenue.

A strongly unstable airmass in a moderately sheared environment squeezed between two fronts resulted in several clusters of destructive thunderstorms. The most intense thunderstorms propagated north to south along a stalled front dividing very unstable air near and west of Interstate 95, from notably more stable air closer to the Chesapeake Bay.
