

# NWS Melbourne, Florida

## 2008 SKYWARN™

### Recognition Day Results

**Brian, KI4HLW, operating Echolink**

**Ray, KI4RHL, operating VHF**

**Don, AF4Z & George, K4PX working 40m HF**

**Max, KJ4EUT & Corey, KJ4FHW working 20m HF**

**GAP Voyager, CL33 rotatable beam & VHF tower**

**Portable VHF towers with 2m & 6m VHF beams**

**During the first weekend of December**, the National Weather Service Office in Melbourne, Florida supported SKYWARN™ Recognition Day for the 10th consecutive year. The event for Amateur Radio (ham) operators was held from 7 pm Friday December 5 until 7 pm Saturday December 6 and was co-sponsored by the **National Weather Service** and the **American Radio Relay League**. The event is held each year to celebrate the contributions that ham radio operators make to the National Weather Service during times of critical weather. During the event, hams across the country contact as many other NWS offices as possible using their radio equipment. The contacts are received and logged at the individual NWS offices by volunteer amateur radio operators and licensed NWS staff.

During the 2008 special event, operations from NWS Melbourne included two High Frequency (HF) stations, two Very High Frequency (VHF) stations, a digital station (radio teletype) and a PC-based EchoLink (VoIP) station. HF operations utilized the 20, 40, 80 and 160-meter bands with both SSB (voice) and CW (morse code) modes. Antennas used were two rotatable beams at 35 feet (primarily 20-meters), a GAP Voyager (40, 80, 160-meters), a GAP Titan (digital modes) and three rotatable beams at 35 feet for VHF (2-6-meters). Amateur Radio operators from the Treasure Coast Weather Net (TCWN) and Martin County ARES/RACES participated as well as operators from several groups in Brevard County (Platinum Coast Amateur Radio Society, Indian River Amateur Radio Club and the Florida Contest Group). Several licensed NWS Melbourne meteorologists ([East Central Florida SKYWARN™ Group](#)) also operated during the event. The NWS Melbourne East Central Florida SKYWARN™ Group special call-sign **WX4MLB** was used.

*NWS Melbourne thanks the individuals who supported the event, including those assisting with antenna and station set-up, those who loaned equipment, and of*

course the dedicated operators. We also appreciate the work of the many individuals who provide valuable SKYWARN™ communications services and severe weather reports throughout the year - and we thank the hundreds of radio operators who took the time and effort to 'work' us during the event. Finally, GAP Antenna Products, Inc. is recognized for providing use of the GAP Voyager.

### The 2008 preliminary results:

<b>Total Contacts:</b> 1191
<b>States Contacted:</b> 50
<b>NWS Stations Contacted:</b> 74
<b>Countries Contacted:</b> 38
<b>Bands:</b> 2, 20, 40, 80, 160 meters
<b>Modes:</b> SSB, CW, Packet, RTTY, PSK31, Echolink
